

## **STUDENT PARTICIPATION IN ORGANIZED POLITICAL AND COMMUNITY ACTIVITIES**

The board recognizes that worthy and appropriate educational values can accrue from student participation in appropriate political and community activities. Therefore, the board authorizes the administration to approve participation by students in political activities and community activities which are not normally possible in a classroom setting, so long as they do not unduly interfere with the student program and/or the normal operation of the school.

The superintendent shall develop guidelines for implementation of this policy.
