Adopted: November 4, 1993  
Last Review Date: February 1995

## **STATEMENT OF PHILOSOPHY**

It is the belief of the School District of Waukesha that the purpose of education is to meet the intellectual, affective and emotional needs of individual learners. Emphasis upon a moral and ethical value system will enhance development of a self-identity and facilitate students becoming productive members of society. Knowledge of and skills in the broad areas of critical thinking, sciences, humanities, career awareness, physical well-being and technology will serve as the foundation of this development. The educational program in the Waukesha schools will foster independence, self-expression and development of a personal value system which will prepare learners to meet the demands of an ever changing society. This can best be achieved through the cooperative effort of the board, school staff, students, parents and members of the community.

The provision of an education consistent with the mission and philosophy of the district is the central concern of the board's policies and administrative guidelines.

The superintendent is charged with the development of curriculum to be consistent with this policy and state and federal laws.
